Luggage Locater

Elbowing your way through the throngs at the conveyer belt to retrieve your luggage may be a thing of the past. The new Easy2Pick Luggage Finder System will let you know when your bags hit the belt, making it easy to locate your luggage. Available either as a luggage tag with four LED lights that flash a custom pattern, or as a wireless receiver that attaches to your key chain and blinks when your luggage is close, the device works up to 60 feet away. Simple one-touch operation makes this a must for every traveler. *You can purchase Easy2Pick at www.amazon.com.*
